

NEW PERFIN FOR USE BY THE EDITOR OF THE PERFINS BULLETIN

On March 26th 1995, John Lyding, editor of the American "Perfins Bulletin", began to use a new perfin on his outgoing mail. The perfin is a design in the shape of an anchor. I should be interested to know if the anchor design has any special significance to John, or the Perfins Club.

The illustration below is actual size.

**This is a sample of the
new perfin device used
by John F. Lyding,
Editor of The Perfins
Bulletin**
